

## CUSTOM REFINISHING, MAINTENANCE & REPAIRS

Quite often, restoration costs less than replacement on quality items. High quality furniture, doors and woodwork may be restored or repaired several times in its history, maintaining a functional and beautiful appearance for generations.

Restoring woodwork becomes a deeply fulfilling and rewarding process as you see worn pieces with faded panels and crackled finishes come to life revealing wood grain that was hidden, hardware that was tarnished, and a beauty that seemed lost.

Old World Design's purpose is to use superb craftsmanship, to provide the highest quality restoration solutions for those pieces which shouldn't be allowed to be lost to time. This craftsmanship is an intense layered process requiring a very high level of skill and training. Although the process may take a few days and multiple artisans, it will leave you with something to be proud of for a lifetime.

However, Maintenance and Repair may be the only solution required. Old World Design often saves their customers from unneeded restoration costs when all that was required was repair and maintenance. Call Old World Design for a free consultation and recommendation.
